

STYLE GOODIES

THE TASTIEST STYLE TREATS DELIVERED FRESH

1.06.2008

Mistified

For us beauty junkies, there's not a mojito on the planet that is as refreshing as a hydrating facial mist - they're deliciously energizing but contain none of the beauty-leaching effects of rum. Plus, they make it easy to **look and feel invigorated when you're traveling**.

I've only recently started using this alcohol-free **Hydro-Derm Infusion by esenté** and have already gotten noticeable results (after hugging a girlfriend recently she began rubbing her cheek against mine and stated "Your skin is so supple!" How thrilled was I?) This mist not only hydrates and refreshes but actually aids in ingredient penetration so anything you apply afterward (like your moisturizer and SPF) is more easily absorbed. Grapeseed extract protects and willowherb extract calms and has anti-inflammatory properties so your skin is less likely to react or become irritated by other products.
